Technology in the Classroom

We recognize that technology, such as laptop computers, personal digital assistants, electronic readers, and other emerging technologies, can serve as educational tools for students. Personal technology devices are stored and secured in your school locker. Students may lose the privilege of using the technology in a classroom for a period of time if it is deemed as being misused, such as, entertainment or distracting others. Students who want to bring these types of items into the classroom need to do the following:

a) Parent/student signature on a Personal Technology Contract
b) Verbal permission from the classroom teacher
c) Understand that you are responsible for any loss or damage to the item(s).
d) Agree not to use the item as entertainment or to distract others in class.
e) Use a protective and carrying case for the device: **not a backpack.**

Personal Technology Contract

This contract will serve to notify school personnel on the use of a personal electronic device ______________________ for educational purposes in the classroom settings. It is understood that my child may lose the privilege of using the technology in a classroom for a period of time if it is deemed as being misused, such as, entertainment or distracting others. The responsibility of the personal electronic property remains with the family in case of damage, loss, or theft.
